

THE CHINOOK ADVANCE

Vol. 22

Chinook, Alberta. Thursday, March 14th 1940

NO

Province of Alberta
Department of Agriculture

Protect Your Horses

Equine Encephalomyelitis
(Sleeping Sickness)

An outbreak of the disease may occur in Alberta this season.

VACCINATION

with Chick Vaccine is the only preventative.

PROCEDURE:

1. Vaccinate before seeding.
2. Two doses are required, given seven to fourteen days apart.
3. The Vaccine is available at Drug Stores, or may be obtained from Veterinarians, and some Municipal Districts may handle it.
4. If a qualified Veterinarian is not available, the Vaccine should be administered by some other person trained by a Veterinarian. Farmers wishing to do so may obtain a syringe and learn how to vaccinate their own horses.

Vaccine is effective only when administered prior to the outbreak of the disease.

Vaccinate Early!

The Department of Agriculture recommends vaccination as an insurance against loss.

HON. D. B. MULLEN,
Minister of Agriculture.

Chinook Red Cross Society

The regular meetings of the Chinook Red Cross Society are held in the Chinook Hotel every third Wednesday of the month. The next meeting is to be held on April 17th. Everyone is cordially invited to attend.

The latest to become paid-up members are:

Messrs Connor, Wilson, Mr. and Mrs. A. E. Roberts, Mr. N. Schmidt, Mr. D. Anderson and Mrs. Nicholson.

A fine contribution was received from the Hobby Club of the Intermediate Room of the Chinook School.

The Chinook Red Cross Society plans to sponsor a Picture Show on Friday, April 19th, at 8 p. m. Keep this date open, and be prepared to enjoy a good feature-length show along with cartoons and a comedy.

Prices: Adults .35, High School Students 25 Children .10

Mrs Bird an old-timer of the Youngstown district died suddenly yesterday.

Gladien Courts who underwent an operation for appendicitis in Calgary last week is now progressing favorably. Mr and Mrs. Courts accompanied her to Calgary.

Mr. and Mrs. W. Barros are spending a few days in Calgary this week.

Birthday Party For Mrs. Berry

A very pleasant party was held at the home of Mrs. H. F. Berry when a number of old-timer friends gathered to celebrate Mrs. Berry's 82nd birthday on Wednesday March 13th. The afternoon was spent in playing games and Mrs. Berry was lucky winner of the prize. A very fine lunch was served by the ladies and a new style of table fork was introduced by Mrs. Lee which she very gracefully demonstrated.

THIS SWELL CEREAL IS BETTER FOR ME THAN MEDICINE!

"I couldn't make up my mind which was worse — to endure constipation or try to cure it with harsh purgatives. Now I do neither. I prevent it by eating Kellogg's All-Bran. It's a lack of intestinal bulk that causes this common type of constipation. All-Bran supplies the needed bulk and also the intestinal tonic vitamin B₁. I eat it as a cereal or in delicious muffins. It's great to be 'regular' again." You can get All-Bran from any grocer. Made by Kellogg's in London, Canada.

Chemistry In Agriculture

The current year marks two events of more than passing interest and importance to the agricultural industry of Canada, for 1940 is the one hundredth anniversary of the birth of the chemical fertilizer industry in Great Britain, and January of this year brought to a close the life of Dr. Frank Thomas Shutt, C.B.E., who for nearly half a century, as Dominion chemist labored to make available to the farmers of this country the benefits of higher yields and greater profits through the application of scientific fertilizing methods.

To date the use of chemical fertilizers has not been applied by Western Canadian farmers on a wide scale as a means of increasing yields of cereal crops, but a new factor has arisen which may serve as a stimulant to the utilization of chemicals to promote more rapid and vigorous growth and to increase yields. Reference is made to the fact that this year's grain crop in Canada is likely to be produced under conditions of greater demand due to the exigencies of war, always providing, of course, that the war does not collapse within the next month or two, a probability which appears to be somewhat remote at the time of writing.

Although comparatively few farmers in Western Canada are using chemicals on a considerable scale, it is now generally recognized that, under certain soil and climatic conditions, earlier maturity and greater yields can be induced by the judicious use of chemical fertilizers. The farmer, however, has to be something of a scientist himself, if he is to be able to secure the maximum benefit which may be derived from their application to the crops. For instance, he should know something of the chemical composition of the soil in which his crops are grown. He should know the constituents in which his soil are deficient and should make a study of weather and moisture content conditions, so that he will know when it will be profitable to apply artificial stimulants to his grain and when it will not pay him to do so.

Value Is Variable

Practical farmers have found, for instance, that during dry years it does not pay to apply chemical fertilizers to the crops except in the earlier stages of their growth while there is sufficient spring moisture in the soil to render them readily soluble. At this stage, growth is hastened, resulting in earlier maturity. If drought continues throughout the growing season, farmers have found that later applications do not further stimulate growth or increase yields, and in some cases they are actually a deterrent. This, it is believed, is due to the fertilizer remaining too concentrated to benefit the plant.

Students of agriculture learn that the complete fertilizer consists of three principal constituents—nitrogen, phosphorus and potash. Technical agriculturists recognize that, generally speaking, the soil in the northern bush areas of the three provinces is deficient in nitrogen and this lack is believed to be due to the leaching of the soil by rains. The principal deficiency in the southern areas of these provinces is said to be phosphorus, and the blame for lack of phosphorus is expressed in the belief that continuous cropping to cereals has exhausted the land of phosphates. These of course are generalities and may vary greatly in individual districts and on individual farms, depending upon conditions, the nature of the soil, the use to which it has been put and the methods of farming which have been followed.

Great Strides Made

From Europe, in 1888, one year after he was appointed Dominion chemist, the late Mr. Shutt brought back to this country the discovery made in that year by Helbrecht and Wilfarth of Bernburg, Saxony, that leguminous plants are able to extract nitrogen from the air, though the need of nitrogen in the soil to stimulate the growth of plants of other orders was recognized as long ago as 1795. It was in 1840, however, that Lawes discovered at Rothamstead, England, that superphosphates, which he produced by treating old bones with sulphuric acid, would stimulate the growth of turnips. Two years later he started the world's first fertilizer factory at Deptford, thus founding an industry which has been growing ever since.

As stated by Leonard L. Knott, in "The Oval", house organ of Canadian Industries, Ltd.:

"In 100 years the science of the soil travelled a long way. The modern farmer is no longer a haphazard tiller of the soil, dependent entirely upon a grudging nature. In the laboratories of Great Britain, Europe and Canada scientific allies have been developed and are still being developed to aid his hardened hands. In Canada for instance, in the laboratories of C-I-L, scientific farming is an accepted fact. Industrial chemistry remains true to the land and modern soil chemists carry on the tasks set for them a century ago."

Long-Distance Chess

The Greater German Chess Association announced that 200 German soldiers in the Westwall fortifications were now playing long-distance chess with one another, making each move by postcard. Each soldier plays three games at once.

British ships passed through the Panama Canal in 1938 totalled nearly 1,500, or an average of four a day.

Cold winter weather may reduce the cranking ability of a battery 50 per cent. or more.

Sky Writer For Finland

Russians May Soon Be Reading New Kind Of Propaganda

Finland will have a new propaganda at its disposal shortly. If the Finns want to make the Russians take notice, "Lucky" Newhouse's talents as a sky writer may come in handy.

Newhouse, christened Luke by his Dutch parents, has left Canada to join the Finnish air force. He takes with him 450 official hours in the air or about 1,000 unofficial count.

Turned down by the R.C.A.F. because of his eyes, the flying Dutchman offered his abilities to Finland. Montrealers know him for his sky-writing and he once operated a flying school. Recently he has been living in Toronto.

As a boy he lived near the German border. He remembers the post-war days when German officials were glad to sell their automatic pistols for a dollar. The result was an epidemic of armaments amongst the Dutch high school students.

Traveling light, Newhouse expects to pick up his equipment somewhere in Scandinavia.

SELECTED RECIPES

RAISIN PIE

- 1½ cups seedless raisins
- 1 cup boiling water
- ½ cup white sugar
- ½ cup Bee Hive Golden Corn syrup
- 4 tablespoons cream or milk
- 2 tablespoons St. Lawrence or Durham Corn Starch
- 2 eggs
- 1 tablespoon butter
- 2 tablespoons lemon juice
- 2 teaspoons grated rind
- ¼ teaspoon salt

Cook raisins in water until tender. Mix corn starch with half the sugar and all the milk and stir into raisins, stirring constantly until thickened. Add corn syrup, Beat eggs, add remainder of sugar, salt and lemon juice. Add to raisins. Cool slightly, then bake between two crusts in hot oven.

LAYERED PEACH AND RASPBERRY MOLD

- 1 package Orange or Raspberry Jell-O
 - 1 pint hot water
 - ½ cup canned sliced peaches
 - 1 cup fresh raspberries
- Dissolve Jell-O in hot water. Arrange sliced peaches in bottom of mold. Pour on Jell-O, being careful not to disarrange peaches. Add raspberries. Chill until firm. Unmold. Serve in slices and garnish with whipped cream, if desired. Or serve as salad with mayonnaise. Serves 6.

We can always do our hardest work before breakfast. It is getting up.

The Turkes will welcome the thought that this time the hard-fighting Anzacs are on their side.

FOR CHAPPED SKIN

Made of a vinegared and perfumed oil which is gentle and soothing to the skin. It is the stimulating and refreshing action of the oil which brings the skin back to its normal condition. It is the best remedy for chapped skin, dryness, itching, and other skin troubles.

Allies Must Not Fail

Former President Of Czechoslovakia Says Nazi Regime Must Go

Eduard Benes, former president of Czechoslovakia, said that the Allies must not fail in their duty "mercilessly to do away with the Nazi regime," for which the Germans "as a nation" must accept responsibility.

"There are millions of Germans who do not agree with Nazism, but now everything was all right," he said. "It is impossible to conceive international ethics in which a government destroyed its neighbors, robbed and plundered several nations, committed the worst crimes, killed hundreds and thousands of its opponents, and finally, when the arm of justice intervened and satisfaction and guarantees were demanded, the new government announced that only members of the former regime were responsible for everything, and that now everything was all right."

Benes said he "proudly acknowledged the Czechoslovak government's responsibility for what went on in the ill-fated central European country during the 20 years of its existence."

The former Czech president declared peace could be ensured only "if it is understood that freedom is indivisible. He called for a new system of European solidarity, including guaranteed freedom of the smaller central European states, federal units in the different parts of Europe, a re-created League of Nations and a fresh system of economic collaboration."

"Events show it was impossible to live at peace with Germany," he said. "Czechoslovakia made the terrible sacrifice which to-day regards as its greatest and fateful task in this war."

Help Red Cross

Crete Indians In Manitoba Are Donating Furs As A Contribution

About six hundred Crete Indians, living in the vicinity of Nelson House, Manitoba, a remote trading post more than four hundred miles north of Winnipeg, are making their contributions to Canada's war effort in traditional style. Information received by the Indian Affairs Branch of the Department of Mines and Resources, Ottawa, as to the manner in which these natives are conducting a drive in aid of the Red Cross reveals that each Indian has been asked to donate the pelt of a fur-bearing animal, even if only a squirrel or weasel.

The furs collected in this manner will be sold to the traders, and the proceeds turned over to the Red Cross.

The wood duck is the most beautifully marked of all American ducks.

Speech Read At Banquet

Was Prepared By Lord Tweedsmuir For Boy Scouts' Association

The last writings of Lord Tweedsmuir, Canada's late Governor-General, were read to the annual banquet of the Boy Scouts' Association of Canada in Toronto. His Excellency was to address the banquet and his unfinished and uncorrected speech was sent to the association at the direction of Lady Tweedsmuir.

Canada's tremendous wartime air effort will place her "in the very forefront" of aeronautical development after the war and supply her with a potentially great peace-time asset in the form of a large body of trained airmen, Lord Tweedsmuir predicted in his speech.

Lord Tweedsmuir suggested linking of Scout training more closely with the practical problems which are facing our growing youth. "We are giving our Scouts an admirable moral and physical discipline which is the true basis for a worthy and successful life," he wrote. "You cannot put the value of that too high. The problems of youth are more difficult to-day than ever before, and they are not going to be easier when this war is over. Cannot we, while these boys are in our charge, do more by advice and training to see that when they enter the grown-up world they will have a reasonable chance? Cannot we, while keeping in the forefront our moral and spiritual ideals, take pains to see that our Scouts, when they enter adult life, shall have a real chance to reap the fruit of their training, and shall not get into the wrong grooves, or into blind alleys which lead to a dead wall?"

Goats are raised primarily for their milk, with their hides as secondary product.

It's Easy to Erect GYPROC FIREPROOF WALLBOARD

Light enough to be easily handled—sturdy and tough to provide a permanent job—Gyproc is the ideal material for walls and ceilings. The large sheets of pre-cast fireproof gypsum reach from floor to ceiling. Just a few sheets nailed in place and the job is done.

And Gyproc gives you all these advantages:

- FIREPROOF—therefore safe
- PERMANENT AND DURABLE—therefore economical
- WILL NOT CRACK, WARP, SHRINK OR SWELL
- INVISIBLE JOINTS—panel strips are unnecessary
- SMOOTH, DUST-FREE SURFACES—easy to keep clean
- TAKES ANY TYPE OF DECORATION—no monotony
- THE LIGHTEST WEIGHT gypsum wallboard made in Canada.

Gyproc is sold everywhere in Canada. See your local dealer in Lumber and Builders' Supplies.

GET GENUINE GYPROC—identify it these two ways:

1. Look for the name GYPROC on the back of every sheet.
2. Look for the Green Striped bottle sides. Accept no substitutes.

CHAPTER XV.—Continued

Starting in the withering cold of the dusk before dawn, they reached McQueen's camp of two nights before. Searching the brush and snow Alan and Noel looked everywhere for a message from Heather but found only her small moccasin prints in the snow. Later in the morning, Alan, who was ahead of the team watching for treacherous ice over quick-water, suddenly stopped, gazing intently upstream. The dogs moved up to him and lay down. "Hand me the glasses," he called to Noel at the rear of the sled.

Taking the binoculars from where they lay beside three rifles in skin cases, lashed to the wrapping lines,

LOOK OUT FOR YOUR LIVER

It may be the cause of your troubles. Buck it up the right way, with Fruit-A-tives. Feel grand.

Your liver is the largest organ in your body and most important to your health. It pours out bile to digest food, gets rid of waste, stores energy, allows the proper nourishment to reach your blood. When your liver gets out of order food decomposes in your intestines. You become constipated, stomach and kidneys can't work properly. You feel "lousy"—headache, backache, dizzy, dragged out all the time. Relieve yourself of these miseries, as thousands have—with Fruit-A-tives, for 35 years Canada's largest selling liver remedy. Fruit-A-tives stimulate your liver, bring prompt relief—make you feel like a new person. Get Fruit-A-tives at your druggist's today, 25c, 50c.

FRUIT-A-TIVES Liver Tablets

bled boulders, up steep banks, to buck and flounder through the drifts, and the heavy sleds cruelly sapped the strength of men and dogs. Lashed to the howl by thongs Alan and Noel strained and pulled with the willing Ungavas as they fought with their load, until exhaustion forced them to camp.

Through the night the "drifter" pounded the valley. In the gloom of the bitter dawn, two lean-faced, tightly belted men again hitched the dogs and started into the snow smoke. With his exhausted dogs McQueen would never wallow through the shifting drifts, which blocked the portages. He would wait and rest his team, thinking the men behind would do the same, until the wind blew itself out. Here was the chance to gain on the sled ahead with his stronger huskies and Alan made the most of it. On through the short day he mercilessly drove himself and his team, trotting over the good going of the swept river ice and lifting and hauling at the shores where the river was still open or the ice dangerous. Blinded by snow constantly masking their tortured faces, bucking the deep drifts of the portages, panting men and dogs pushed on and on until the black night fell like a tent and drove them to shelter.

At dawn the wind had blown itself out and the snow stopped. Stiff in every muscle from the long strain, Alan dragged himself out of his sleeping bag, the pinched face in his hood black from frostbite and his lips cracked from the two days in the stinging wind and snow.

"Fresh trail made this morning," said Alan.

"How far do you guess we traveled in that drifter, Noel?" he asked the Indian who limped as he brought wood for the fire.

"Eet was all gain? McQueen nevaire move. We travel tirty—forty mile for sure. Oh-oh!" groaned Noel, dropping the wood to rub a leg. "I got de mal-racquette!"

"I'm stiff as a spruce stick, Noel," replied the other. "Wrenched my shoulder with all that lifting! Let's have a look at the dogs! Here, Rough, Shot!"

Slowly the dogs responded to the calls of their master. One after another they broke from their snow blankets to shake themselves but the iron bodies of the Ungavas were, after all, but blood and thews and bone and, along with the men, they had paid the penalty of the two days' battle with the drifts and the up-hill slavery of the river shores.

Poor Shot, who had never faltered when asked for the last ounce of his strength, limped around with a wrenched shoulder. The foot-sore Rough and Powder, growing thinner day by day, hobbled on stiff legs. The veteran Rough, lean as a lynx still carried his plume of a tall bravely arched above his back, but he failed to rise and roll in the snow at the call of Alan. The "drifter" had taken its toll of the Ungavas.

"They're pretty stiff, Noel, but we've got to go on—on!" insisted Alan.

He made the dogs lie on their backs, feet in the air, while he and Noel examined their shaggy bodies, banded with muscles like wire cables, and searched their paws for pad cracks and balled snow between the toes which would cripple them. Then, over the young snow left by the storm, the sled pushed on up the river, drawn by its crippled team, and led by two men with tightened belts, and in the eyes of their pinched faces, the fire of desperation.

Toward noon Noel, who was in the lead, raised his hand, stopping the team, then pointed to the shore ahead. The two men tore their rifles from their cases.

"Fresh trail, made this morning!" said Alan. "But that can't be McQueen. He's a day ahead of us yet, if he never moved in the blow. Let's have a look at it!"

They started the team and soon reached the toboggan trail which led down from the spruce through the alders and over the heaped shire snow to the river ice. Back tracking to shore, the two men stared in amazement at the bear-paw, snow-shoe prints in the new snow; then gazed into each other's startled eyes.

"Naskapi!"
"By gar! Dat ees bad—veree bad!"
"If they're headed up river far, they're going to strike his trail where he started in the young snow after the drifter! They'll follow him and sneak on his camp!" Cameron's frost-burned face graved.

"Maybe dey not hold to de river." "They will and we've got to overhaul them, Noel—travel all night! If the Naskapi get her, my God! It's her horrible! We've got to reach her, Noel, if we kill ourselves and the dogs!"

(To Be Continued)

Advance in Surgery

Fractured Collar Bone Can Now Be "Wired" For Quick Recovery

A Toronto General hospital surgeon has developed a new "wiring" operation whereby the use of a fractured collarbone is restored within an hour, the Evening Telegram said.

Method of the surgeon, a member of the University of Toronto department of surgery and who prefers to remain anonymous, has been used also in the Toronto Hospital for Sick Children with complete success, the paper said.

In the operation, a small cut is made in the skin over the collar-bone and a wire of fine steel is threaded into the spongy centre of the collar-bone. The fractured ends are manipulated until they are in a normal position and the wire is carried through, holding the fracture together. A patient finds after the operation that he can move his arm and shoulder without pain.

The old method of repairing the fracture is to tape and bandage the shoulder and arm for a period of three to five weeks. During this time neither arm nor shoulder could be used.

A Different Cake For Every Week

Just off the press is that new book of Mrs. H. M. Aikens named "52 Cakes". There's a great deal of work in getting up such a book and to be absolutely accurate each recipe is tested by a number of professional cooks as well as ordinary housekeepers to see that they get the same results.

No money is asked from our readers—just a return label on any Canada Star product like Crown Brand Corn Syrup, Benson's Prepared Starch, Canada Corn Starch, etc. for "52 weeks" or 52 Biscuits or 52 Desserts or 52 Baking Secrets. One label for each booklet—and you can have all four for four labels addressed to—Canada Star Home Service, Dept. W.N.U., P.O. Box 129, Montreal, Que.

This year is the 2,600th anniversary of the Japanese Empire's founding.

"I hear you've got a new maid."
"Yes—the last one handed China as if she were Japan."

Mr. Caffeine-Nerves Gets Erased

OFFICE MANAGER: Sorry I lost my temper, Miss Jones—I don't know why my nerves are so jittery lately!

MR. CAFFEINE-NERVES: This office would drive anybody to the nut-house!

MR. CAFFEINE-NERVES: Hush up, meddler!—stick to your shorthand!

SECRETARY: I think I know your trouble—too much tea or coffee! You've got caffeine-nerves and the thing that will fix that is to drink Postum instead.

OFFICE MANAGER: Miss Jones, you're psychic! I've been drinking Postum for a month and now I can't figure out why I was always so upset!

MR. CAFFEINE-NERVES: I'm always erased when they switch to Postum!

Many people can safely drink tea and coffee. Many others—and all children—should never drink them. If you are one of these, try Postum's 30-day test. Buy Postum and drink it instead of tea and coffee for one month. Then, if you do not feel better, return the container to General Foods, Limited, Cobourg, Ont., and we'll gladly refund full purchase price, plus postage. Postum is delicious, economical, easy to prepare, and contains no caffeine.

POSTUM

Royalty Visits The Clydeide

Queen Elizabeth Concerned Over After-The-War Problem

Queen Elizabeth displayed solicitude for the war's aftermath in the now bustling Clydeide as the King and Queen visited John Brown and Company's yard, the most famous on the Clyde.

Expressing pleasure at improved employment in Glasgow and on the Clydeide, Her Majesty remarked that she was sorry to think it was due largely to war work.

"What I am anxious about is what is going to happen in the future," she added. "Have you considered the problem of what will occur after the war?"

Three Glasgow councillors, who accompanied Their Majesties and Winston Churchill, First Lord of the Admiralty, said the problem was receiving serious consideration.

Kipling's Home A Memorial

Has Been Guarded Carefully With That Object In Mind

Bateman's, the lovely 16th century home of Rudyard Kipling, with the death of Mrs. Kipling, may become a national memorial. Mrs. Kipling preserved and cared for it to the last for that purpose.

Little was known of Mrs. Kipling for she was of a shy, retiring nature and disliked publicity of any kind. They were married when Kipling was 28 and lived in a little bungalow in America where he finished "Many Inventions" and began "The Jungle Book".

In these early days, she was his secretary, banker, business agent and farm superintendent and even his sentry against those who would invade privacy.

The more knowledge you get, the more things you aren't sure about.

GEMS OF THOUGHT

GRATITUDE

Gratitude is not only the memory but the homage of the heart—rendered to God for His goodness—Willis.

Our thanks should be as fervent for mercies received as our petitions for mercies sought.—Charles Simmons.

Are we really grateful for the good already received? Then we shall avail ourselves of the blessings we have, and thus be fitted to receive more.—Mary Baker Eddy.

He that urges gratitude pleads the cause both of God and men, for without it we can neither be sociable nor religious.—Seneca.

To the generous mind the heaviest debt is that of gratitude, when it is not in our power to repay it.—Franklin.

He enjoys much who is thankful for little; a grateful mind is both a great and a happy mind.—Secker.

Tip For Motorists

To start a flooded automobile engine quickly, disconnect the air intake pipe leading from the intake manifold to the windshield wiper or vacuum tank, thus letting raw air into the manifold. When the gasoline burns, after starting the engine, close the connections again.

The Art Of Balking

So esteemed was the art of balking in ancient Rome that Emperor Trajan established an exclusive college for bakers, whence none could quit until graduated. These bakers were eligible to become senators on graduation.

There are 600,000 piano accordions in America.

Experienced Leaders are

VITAL for VICTORY

In six months of war the Mackenzie King Administration has set an unprecedented record of *getting things done* without fuss and furor. Under its steady leadership, Canada has gone ahead on all fronts—war, economic and domestic. With clear heads and with feet on the ground, this group of purposeful men is making every ounce of Canada's weight felt in our fight for freedom. What it has done has been done thoroughly: there has been no loose thinking; no half-measures; no waste of men, money or materials.

Some of the Mackenzie King Administration Wartime Accomplishments

It united Canada as never before—Every province is heart and soul behind the Empire's war effort this time, thanks to the Administration's truly national policies.

The First Division, completely equipped, has been sent overseas to a Mother country prepared to receive it.

The Second Division is recruited, equipped and ready to go over.

The great Empire Air Training Scheme—sponsored and mainly financed by Canada, has been launched on a planned and ordered basis.

Naval Defence for both East and West Coasts including Air Force, Mine Sweepers and Convoying, has functioned efficiently since the outbreak of War. Cf. Lt. a Senior British Naval Authority has said: "No finer work is being done anywhere by the Royal Navy itself."

Price Control of all commodities, including such vital necessities as wool and sugar, has been established, with prices pegged low for the poor man. The profiteer is out, and will be kept out—in marked contrast to the free-for-all of the last war.

Shipping Control and Foreign Exchange Control are firmly established on sound lines and are functioning smoothly and effectively.

A \$200,000,000 War Loan was over-subscribed within two days of its launching, a record that proves public confidence. Its reasonable rate of 3½% contrasts with 5½% tax-free rate of the last war.

Political and Private Patronage has been stamped out: merit is the sole basis for selection or promotion in our armed forces.

On March 26th show your faith; vote for the Candidate supporting Mackenzie King and help make sure there can be no break in Canada's steadfast stand in these critical times.

FORWARD WITH

MACKENZIE KING

The National Liberal Federation of Canada, Ottawa, Ontario.

IN THE ANCIENT ROMAN EMPIRE

In 400 B. C. beer was popular with the Armenians, while during the first century of the Christian era the Germans and the natives of West Europe (Spain and Gaul) improved the process, and beer made from barley and malt was the popular drink. The Romans were also brewers of Beer. Barley was known to them says Virgil, who uses it in the plural form "hoideu". Beer and vinegar were the drinks of Caesar's soldiers.

Miss Lena Schmidt of Calgary arrived on Saturday and will spend a few weeks with her parents, Mr. and Mrs. N. Schmidt.

Mrs. L. Robinson left on Wednesday for Bowden where she will visit relatives.

Mr. W. Sellers is a Calgary visitor this week.

This just came to light a few days ago:

One of the machinery salesmen, while out driving last fall saw a farmer trying to summerfallow with the aid of a bull. I thinking it was a good opportunity to do some salesmanship, he stopped and tried to sell the farmer a tractor; only to learn that the farmer already had one in the machine shed. "Then why use this antiquated method" asked the salesman. "Because" said the farmer, "I'm just demonstrating to this critter, that life is not all romance." No Sale

Mr. and Mrs. Jas Peyton and daughter, Patricia left Thursday morning by motor for Calgary where they will visit relatives for a few days.

Miss Lena Zawasky left last Saturday for Meringo where she will visit with friends for two weeks.

Mr. E. Sawyer left Thursday morning for Calgary where he will visit for a few days

A number from Chinook attended the Social Credit meeting at Youngstown on Tuesday evening

Mr. N. Courts who has been in Calgary for the past week returned home on Tuesday.

We heard this bright gem of reasoning after the Inspector's visit at the School, this week. Inspector: "What do they call the tablets that the Ancient Gauls used to write on?" High School Pupil: "Gaul Stones, Sir."

Mrs. Maurer who has been visiting relatives in the States for the past two months returned home on Friday.

Social Credit Meeting

Considering such short notice, a large crowd attended the Social Credit Meeting held at the Chinook Hotel on Thursday, March 7th. There were three speakers, viz. Mr. Kell of Consort; Mr. Gerhart, S. C. candidate; and Mr. Quelch, M. P.

Mr. Gerhart explained clearly how he was nominated in place of Mr. MacLachlan. He told of his banking experience and of his work as Mayor of Coronation in handling relief, repairing old houses, grave digging streets, etc. He said he may use his influence in putting many helpful ideas in practice in the dry area. Mr. Gerhart is a firm advocate of Monotary Reform and a thorough student on Economics. He stated he would be willing to spend some money in trying out this scheme in a certain district.

Herbert Hoover, chairman of the Finnish relief fund, announced receipt of a \$100,000 donation from John D. Rockefeller, Jr.
